

# EURO BIG LIFT WORKSHOP

## 13-14.5.2013, ABENSBERG, BAVARIA GERMANY

### 2 Day Heavy Rescue course

International course in German and English  
Fast and Safe lifting for first due responders

#### Day 1

##### Theory: Big Lift Introduction

Includes: weight estimate, „reading“ the scene, equipment, lifting systems, safety, tactics.

##### Practice: Lifting airbags / LiftCamp

Fundamentals, tactics, teamwork, practice.

##### Practice: securing, lifting and shifting a load

Working with sling gear, winches, pulleys, teamwork.

##### Practice: car on the side with entrapment

Securing and lifting, rescue.

#### Day 2

##### Practice: De-compleX

Lifting and cutting passenger car in difficult situations.

##### Practice: Bus Lift

Lifting the bus roof and underside, total bus lift

##### Practice: Car underride

Car underride from the back, under truck axle

For the first time, all Heavy Rescue modules are combined in a single, two-day course. Participants acquire comprehensive knowledge in emergency securing, lifting and shifting of loads.

Rescue crews learn to „read“ the encountered scenario and use their knowledge to perform a fast and safe rescue involving an emergency lift. Particular emphasis is placed on creative use of simple means.
